

# CameraRC Deluxe Edition 2.4.3 - Release Notes

CameraRC Deluxe provides tethering support for the below listed Nikon cameras.

## **Nikon Cameras Supported**

- D40<sup>1,2</sup>
- D40X<sup>1,2</sup>
- D60<sup>1,2</sup>
- D80<sup>1,2</sup>
- D90<sup>1</sup>
- D200<sup>1,2</sup>
- D300
- D300S
- D3
- D3X
- D3S
- D4
- D4S
- D5
- D500
- D5000<sup>1</sup>
- D5100
- D5200
- D5300
- D5500
- D600
- D610
- D700
- D750
- D7000
- D7100
- D7200
- D7500
- D800
- D800E
- D810
- D810A
- D850
- Df

<sup>1</sup>These models require Windows Compatibility Mode be set to Windows Vista Service Pack 2.

<sup>2</sup>These models are not supported on Mac El Capitan (OSX 10.11) and newer macOS releases.

## **Enhancements**

- None.

## **Bugs Fixed**

- Fixed error in save file name when using Camera File name on Mac systems.

- Fixed issues with Hangs and incorrect button labels on White Balance Wizard.
- Fixed issues with White Balance Preset Wizard on Mac getting camera disconnects and getting errors when setting the preset.
- Stop showing of 2 Program Icons on Mac Doc.

## **Known Issues**

- Properties window does not display the Sensitivity (ISO) value when settings are not numeric values (i.e. Lo-1, Hi-1, etc.).
- D850 - currently do not support download of movies larger than 2 GB to the computer.
- On Mac computers the program may hang if Adobe Bridge is running at the same time as CameraRC Deluxe.
- On Mac computers older camera models (e.g., D3, D300, D700, ..) have exhibited issues with intermittent disconnects when shooting in continuous mode with maximum shot counts. See our [Post on Mac Disconnects for more information](#).

## **End of Life Notification**

- Windows Vista is no longer officially supported.
- Mac OS 10.8 (Mountain Lion) and 10.9 (Mavericks) are no longer officially supported.

## **Program Limitations**

- Only one camera can be connected and in use by the program on a single computer.
- Hot switching between camera models (i.e., Changing cameras while the program is running) is not allowed.
- Program cannot be installed onto a network share - can only be installed on a local disk drive.
- Images captured that are not focused in contrast mode live view (i.e., focus indicator not green) will incorrectly display the last phase detect focus point instead of displaying no focus point. The focus points are also incorrectly shown in Nikon Software as they are incorrectly stored in the image by the camera. The degree of this error varies depending on camera model.
- If there are a large number of images (100's) on the memory card installed in the camera it can take a minute or longer for the program to initialize.

## **System Requirements**

- Windows 7 or later
- Mac OSX 10.10 - 10.13
- 2 Gbyte of RAM
- 50 Mbyte free disk space
- Recommended screen resolution 1024 X 768 - lower resolutions supported with scaling.
